

T-Rex Ankle with SMART TECHNOLOGY

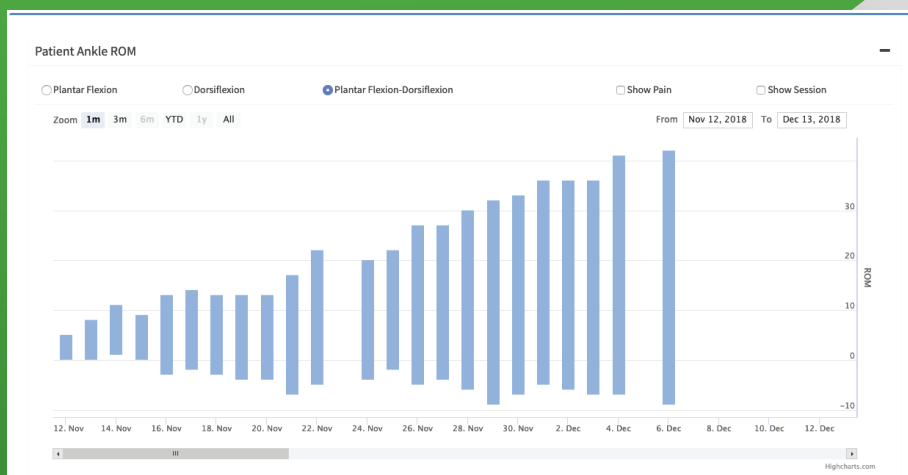

The T-REX ankle is a small in home, **patient-controlled** therapy device that can be used with any household chair. This device allows patients to achieve the **perfect stretch** directly targeting dorsi and planter flexion.

SMART TECH FEATURES

- gives patients physical therapy sessions in the comfort of their own home
- improve compliance
- tracks patients' progress
- allows doctors to schedule and manage patients' sessions remotely

Get better results faster

The information in the graph shown above is real patient data captured using smart technology.
